

HOODED VEST FOR EQUIPMENT

- material: Raintex CH300, knitted polyamide fabric surfaced with PVC, 300g/m²
- developed by the Emergency Services College
- the zip closes from top to bottom, which makes the garment easier to put on
- the hood fits well around the mask
- holes for pressure gauge
- provides protection for compressed air breathing apparatus and the upper part of a chemical protective suit
- helmet may be worn underneath the hood
- identification markings on sleeves
- a 25mm x 250mm reflecting surface on the back provides additional safety
